Manufacturing Cost Models for Aerospace

Physics-Based Mechanistic Cost Models

A DATA SHEET

aPriori's physics-based cost models address common manufacturing processes including sheet metal forming, bar & tube fabrication, welded or mechanical assemblies, plastic molding, sand and die casting, forging, turning and multi-axis machining, and a wide variety of heat treatments and surface treatment or finishing operations.

Deterministic routings generate the lowest cost production method and evaluate the manufacturability of all routings defined in the digital factory. This allows engineering, manufacturing and purchasing professionals to explore cost saving production alternatives down to the machine level.

Manufacturing Process Group	Supported Sub Processes and Operations	Aerospace Application and Example Components
Machining: General Milling	 • 3-4-5 Axis CNC • Drill Press • Deburring • Sawing/ • Jig Boring • Cut-to-Length • Assembly Milling • Gun Drilling • Wire EDM 	Wing Ribs and Spars, Fuselage Frames, Bulkheads, Fittings, Brackets, Seat Tracks, Landing Gear Components, Gearboxes, Transmissions
Machining: General Turning	 2-3-Axis CNC Lathe Roughing Conventional Lathes 2-3-axis Bar Single Point Feed lathes Mill-Turn Single Plunge Deep Bore/ Grooving Multi-Plunge Grooving 	Engine Components, Fluid Handling Systems, Actuation Systems, Couplings, Valves, Sensors
Machining: General Grinding	OD Grinding Jig Grinding ID Grinding Cylindrical Surface Grinding Rotor Grinding	Close Tolerance Engine Components, Landing Gear Components, Fluid Handling Systems, Couplings, Valves, Sensors
Casting	 Sand Casting High Pressure Die Casting Gravity Die Casting Investment Casting 	Engine Components, Interior Components, Exterior and Interior Sensors, Motion Control and Actuation Systems, Hydraulic Fluid System Components, Cargo Systems, Landing and Braking Components
Bar & Tube Fabrication	Bar Forming Knurling Expansion Knurling Notching Flanging Reduction Flaring Slotting Flattening	Hydraulic and Pneumatic Systems, Fuel Lines, Structural Tubing
Aluminum Extrusion Fabrication	Die and Billet Preheating Release Agent Application Cooling Rough Cutoff Straightening Rough Cutoff	Structural Components in Wings and Fuselages, Trim Pieces Inside Fuselage
Forging	Closed Die Hammer Forging Ring Rolled Forging	Pylons, Landing Gear Axles, Structural Frames, Bulkheads, Turbine Cases, Transmission Components
Gear Making	Die and Billet Preheating Release Agent Application Cooling Rough Cuttoff Straightening Redease Agent Aging Application Secondary Material Removal	Structural Components in Wings and Fuselages, Trim Pieces Inside Fuselage

ăPriori

Manufacturing Process Group	Supported Sub Processes and Operations	Aerospace Application and Example Components
Advanced Composites	Hand Layup Automated Tape Layup Automated Fiber Placement	Fairings, Wing Ribs, Stringers, Shear Ties, Frames, Door Panels, Skin Panels, Control Surfaces
Additive Manufacturing	• SLA • Material Jetting • SLS • SLM* • DMLS	Engine Components, Nozzles, Mounting Brackets, Jigs and Fixtures, Prototypes
Powder Metal	Compaction Pressing, Furnace Sintering	Aircraft Engine Components
Plastic Molding	 Single Shot Injection Molding Over-Molding Insert Molding Structural Foam Reaction Injection Molding 	Housings, Lenses, Panels, Enclosures and Containers, Seat Components, Galley Equipment
Rotational Molding and Blow Molding	Extrusion Blow Molding Material Grinding/Pulverizing Trimming/Routing	Ducting/Ventilation Systems, Ram Air Inlets, Avionics Cooling Systems
Sheet Plastic Thermoforming	• Vacuum Forming • Drape Molding	Interior Panels, Seat Shells, Tray Tables, Armrests
Printed Circuit Board Assembly	Component Plated through Preparation Hole Assembly Kitting Depanelization Surface Mount Assembly Conformal Coating	Cockpit Instrumentation, Navigation Systems, In-flight Entertainment Systems, Avionics, Power Management Systems, Control Systems, Lighting

Manufacturing Process Group	Supported Sub Processes and Operations	Aerospace Application and Example Components
Wire Harness	 Wire/Bundle/ Branch Covering Conduit Prep Braid Harness Layout Connector Assembly Splice 	Cockpit instrumentation, Navigation systems, In-Flight Entertainment, Power Management Systems, Control Systems, Lighting
Assembly Joining	 Riveting Robotic Spot Lock Bolts Nutplate Installation Adhesive Bonding Electro-Beam Manual MIG Welding Resistance* Manual Spot Ultrasonic and Welding Friction Welding* Robotic MIG Soldering* 	Fastened Substructure and Skin Assemblies, Turbine Component Welding, Airfame Stucture
Heat Treatment	 Aging Annealing Annealing Hardening (3 types) (4 types) Cyrogenic Hot Isostatic Freezing Solutioning Normalization* Stress Relieving Chromizing* Borizing* Hardening Most Heat (3 types) Treatments-both Tempering (2 types) Iocalized* 	Engine components, Airframe Structure
Surface Treatment	 Shot Blast Degreasing Basic Painting Anodizing Powder-Coat Cart Pointing Wet-Coat Line Painting One-Sided Fraction Painting Plating (4 types) Silk Screening Passivation Vibratory Deburr Chem Film* Posteriory Booth Painting* Protective Coat* Most Surface Treatments-both whole part and localized* 	Structural components, Skins, Interior, Propulsion Systems
User-Guided Processes (for costing without CAD)	• Turret Press • Progressive Die • Bend Brake • Stage Tooling	Early Costing with Minimal CAD Definition

* Additional cost required to develop and deliver the processes listed with an asterisk. The aPriori Professional Services team may also be able to deliver processes not in this list after evaluating the requested processes and confirming the capability to develop a solution.
